

ARDEC
G R O U P

Welcome to Ardec Group

We believe in providing systems that encourage creativity, simplicity, and durability by facilitating the distribution of unique and superlative wash-room products across Canada.

**WASHROOMS ARE THE MOST USED
AND LEAST CONSIDERED SPACES.
WE ARE CHANGING THAT.**

Sinks & Basins

Ardec Group's sinks are fabricated and distributed from our Ontario and BC facilities to our many valued clients country-wide. As with all our products, we pride ourselves in providing quick turnaround times and complete service and support from the design stage until final installation.

Our experienced team and ability to fabricate and deliver a range of custom projects makes us uniquely qualified to be trusted advisers and washroom consultants. We work with designers to bring their unique requirements and innovative ideas to creation and push the boundaries of what a sink can be.

MATERIALS

Our TSL and Vironne lines of sinks are made from solid surface materials supplied from common brands like Corian, Meganite, Krion and LG Hi-Macs. These brands combined allow us to offer our sinks in over 700 different finishes!

Unlike stone-based material, acrylic solid surface can be formed and customized to any shape or size easily. The material is also non-porous and seamless, which prevents staining and water damage without the need for sealing, comes in a broad range of finishes, from swirls to speckles to solid colors, and is easily maintained and repaired if need be.

MONOLITH BASIN

Our award-winning Monolith Basin system is an infinitely configurable hand-washing sink solution for all commercial, retail, public, and hospitality spaces. The basin is a competitive and contemporary design solution that captures the quality of old-world craftsmanship that is effortlessly minimal yet hard-wearing, and versatile enough for any restroom.

- This ADA compliant sink is manufactured with a slot drain to provide an easy way to clean the sink and eliminate bacteria build up.
- The Monolith Basin comes with a unique, fully adjustable brackets, hidden by the sink skirts, that secure the sink to the wall.
- The solid surface material used and the minimalist design give this wall-hung basin a beautiful aesthetic, superior to typical undermount and drop-in bowl sinks.

Full customization of height, width and length of sizing makes this an easy piece to specify. Starting with the A, B, C, D series as a base depending on faucet/choice, you can then add any length to meet sizing requirements or amount of users. Further customization such as adding extra counter space, a baby change table or a bin chute can also be included to give your sink a unique touch.

See our portfolio for examples of what we can do.

Monolith A Series

A trough sink made for deck-mounted fixtures.

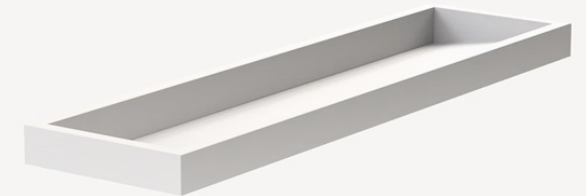

Monolith B Series

A divided trough sink made for deck-mounted fixtures.

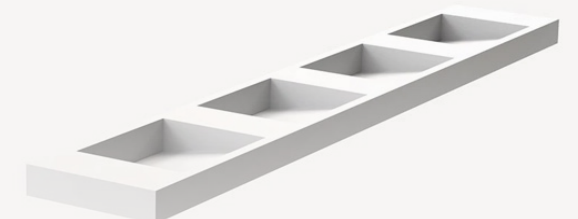

Monolith C Series

A trough sink made for wall-mounted fixtures.

Monolith D Series

A divided trough sink made for wall-mounted fixtures.

Vironne AET Sinks

Vironne's AET Sinks are a unique and robust trough basin, specially designed to withstand tough, high traffic environments such as schools, universities and other institutional washrooms. Distributed exclusively by Ardec Group, both the AET sink and its integrated removable pipeskirt are made from solid surface material and are therefore fully customizable in length, number of users and finish.

ADA and CSA compliance, combined with its slim design and compatibility with both wall and deck mounted faucets, make this product an easy fit into the specification. Furthermore, seamless install and easy to clean, thermoformed corners that eliminate bacteria buildup, make this easy to use for contractors and maintenance personnel alike.

Vironne Pipeskirts

Vironne Pipeskirts provide a sleek, robust cover for all plumbing and electrical components underneath the sink, and are designed to be both unobtrusive and aesthetically pleasing, all while meeting ADA requirements.

Fully customizable and available in any size, they are designed to work with our Monolith Basins, but can also be used with a range of other vanity designs. These steel frame pipeskirts also double as access panels and can be constructed from stainless steel or solid surface material allowing for a broad range of colors.

CALMA® VESSEL SINKS

Bold structures and luscious materials have been skilfully paired to form this beautiful range of vessel sinks. At the heart of each design is the simplicity of a product that functions as flawlessly as it looks. All models are durable, practical and provide a generous wash space to bring a little luxury to your daily routine.

Each product is finished with a UV resistant Gelcoat, guaranteeing that even after years of regular use, the glistening sheen and pure, vibrant colour of your product remains as new. Consisting of approximately 75% crushed dolomite, this natural, environmentally friendly mineral rock is infused with bonding resin content, creating a strong, yet impeccably smooth material.

Finishes

The majority of TSL's distinguished soap and faucets are offered in three PVD finishes, as well as brushed or polished stainless steel.

PVD, or Physical Vapor Deposition, is a process for finishing metal by depositing pigmented titanium ions in a vacuum chamber. The process produces minimal waste and increases the durability of the metal beneath.

Soaps & Faucets

Our range of faucet and soap dispensers, deck or wall mounted, are thoughtfully designed to ensure they have the best the look and feel.

Designed to be as functional as they are beautiful they are made to last for years in high-frequency washrooms; whether in primary schools, corporate headquarters, government buildings, recreation centers or any other public spaces.

RIBBON COLLECTION

An award winning trio of touch-free fixtures that offers a modern, intuitive solution to the flow of the restroom experience. Specified individually although they work best as a team, the Ribbon soap, water, and air fixtures can be arranged however best directs the flow of traffic, according to the needs of any space.

DESIGN

Designed by TSL in unison with renowned British designer Sebastien Conran, these exquisite fixtures were made with a timeless appeal. This collection was developed to meet a need for commercial fixtures that were technologically advanced, sustainably minded, and humanistic in their design. Suitability for any washroom space, a thoughtful design, and 5 distinct color options have combined to make this the number one option for designers country-wide.

SPECIFICATION

Modularity is integral to the TSL approach, allowing specifiers to opt for only what they need: no more, no less. The arrangement and number of the fixtures can be chosen to best fit the environment and user behavior making them a boon for designers seeking maximum flexibility. Whether specifying a single fixture or full sets of Ribbon there is a single code available, making for effortless scalability and simple specification.

RIBBON SOAP DISPENSER

The Ribbon Soap Dispenser is calibrated to dispense solely foam soap. As part of crafting a hand washing experience that is both well-considered and precise, the aeration of foam soap delivers a comfortable volume into the hand. Users are less likely to “double-pump” which is great for supply conservation. Foam also has a pleasing, velvety feel, that feels luxurious in any environment.

RIBBON FAUCET

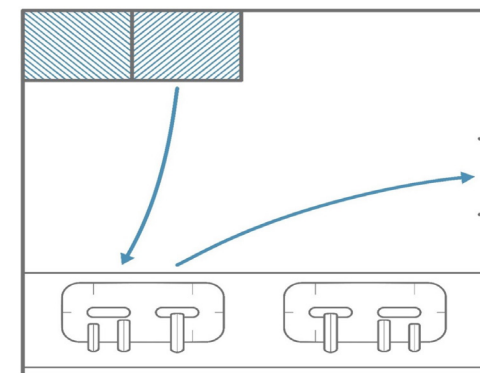

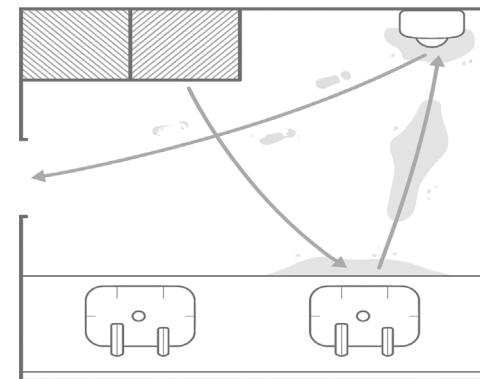

This programmable faucet can be set to run for 20 seconds, guiding the user seamlessly through the CDC-recommended hand washing time. With adjustable flow rates it adapts easily to differing environmental standards and a cascade aerator issues a gentle, smooth flow of water that keeps splatter to a minimum and is pleasing to the user.

RIBBON DRYER

A pioneering innovation upon its debut, the deck-mounted fixture is placed over the basin, keeping water runoff in the sink, and off restroom floors where it can be at best unsightly and at worst a safety hazard.

A smooth transition from washing to drying moves users efficiently through the cleansing ritual. The Ribbon Dryer is also the quietest commercially available hand dryer, encouraging a more peaceful restroom ambience.

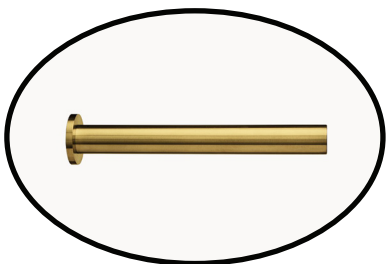

CHANNEL

Elegant enough for boutique installations and the small spaces they often occupy, and efficient enough for high-traffic restrooms that require uncluttered counter space, The Channel System's simplicity makes it adaptable without sacrificing strength.

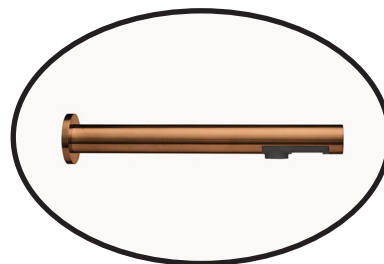

The Channel Fixtures were all designed to conform to the Golden Ratio for harmonious proportions, and all three fixtures were shaped to have a pleasingly sleek silhouette that is both durable and delicate.

SPLASH
LAB

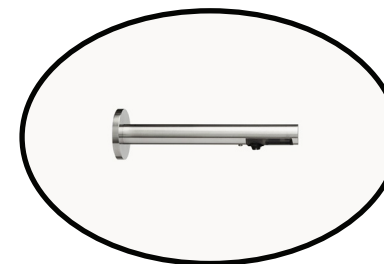

CHANNEL DRYER

A remarkably discreet vent produces a gentle but powerful stream of air that directs water off the hands and into the basin in a pleasant and hygienic manner.

CHANNEL FAUCET

The minimalistic water spout has a marine-grade stainless steel housing engineered to its barest and most perfect form: an uninterrupted cylinder.

CHANNEL SOAP

The reliable IR sensor is placed just in front of the nozzle on the underside of the tube, and makes triggering each soap deposit a seamless and intuitive gesture for the user.

CHANNEL COLLECTION

For easy scalability and a straightforward spec all three Channel System fixtures are sold under one code, with optional faceplate and indicator etchings.

TSL RADIUS FAUCET

Water efficient, hygienic, and sleek, the TSL 882 features an elegant, minimalist wall-mounted spout machined from stainless steel. A separate sensor housing is designed to be affixed directly under the spout, incorporating super-stable IR technology for an easily triggered water flow with intuitive movement. As flexible as it is beautiful, the radius faucet can be specified with mains or battery power, has two flow rates and a sensor range of 2 inches to 4.5 inches. LEED and ADA compliant, the slim, cylindrical case is hard wearing yet sophisticated, making it an ideal specification for high traffic areas without sacrificing visual impact.

L-SERIES COMBINATIONS

Another 20 unique, manual and sensor soap dispensers and faucets are offered in our lineup. Some of our most popular and appealing sensor-operated combinations, finished in chrome or satin, are shown below.

L-980

L-899

This set of sensor-operated, deck-mounted fixtures features a refined straight spout design made with maximum functionality in mind.

An adaptable deck-mounted combination that features an elegantly curved spout and a conveniently placed sensor at the base of the faucet.

L-960

L-799

L-180

L-460

These wall mounted sensor fixtures are extremely robust and suitable for any sink size due to the minimalist design and choices of spout size.

Dryers

Our wall-hung dryers are quieter, more compact and more contemporary than any others on the market. These fast drying wall-mounted units breaks designers free from having to use the same inefficient and uninspiring dryers in every washroom.

The L-M9 is a recessed high speed hand dryer module with a 17 second drying time. A modular, recessed unit with a depth of only 100 mm – it fits comfortably into a standard partition wall. Each module has a unique concealed locking system, a TSL innovation that keeps the locks out of sight.

A discreet and elegant high speed hand dryer makes a big impact on users and a small impact on the environment. With a drying time of only 15 seconds, the TSL.3001 hand dryer is a sustainable and attractive addition to public and commercial washrooms. Lightweight and only four inches deep, this space saving, wall mounted fixture is compact enough to fit within small spaces, and aesthetically refined enough to complement even luxury restrooms.

TUZIO® TOWEL WARMERS

We've fused contemporary design, comfort and luxury to develop this exceptional range of towel warmers. We believe your bathroom should be your sanctuary, so we've designed a bold, balanced and timeless range of towel warmers to reinvigorate your space and make home your favourite place to be. ICO Bath's Tuzio collection is crafted from the finest materials and assembled in Canada with CSA approval.

Choose from hydronic or electric towel warmer options, plus a wide range of finishes to complement any bathroom, including chrome, brushed nickel, white, oil-rubbed bronze, polished nickel, matte-black, brushed gold dark, and brushed gold light.

Washroom Accessories

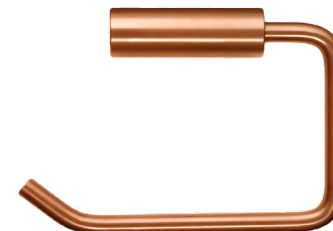

Ardec's washroom fittings are meticulously designed and crafted to meet your needs, and the needs of your client. Each weld, polish, cut and finish is processed to the highest standard, as we believe attention to details makes the difference between a washroom and a welcoming environment.

Our understated yet sleek and stylish collection, includes a variety of products from shower fittings to towel holders, grab bars to waster bins, coat hooks to toilet roll holders and so much more. This makes the specification process easier for interior planners by offering one place for a full line of products for their washroom design.

Our TSL and ICO lines combine to provide over 800 different washroom accessories.

See all: <https://www.ardec-group.com/accessories>

More often than not, quality design stops before it gets to the most necessary space in any building. We believe that washrooms can be a beautiful extension of the interior design with the use of the right materials, finishes and fixtures.

Studies show that people will spend on average of one and half years of their life in a washroom. Join us in working together to ensure that the time is spent in a well-designed room.
